

NEONIOUS

Job Offer

Ever since the invention of Bitcoin in 2008, thousands of people all over the world let their computers solve cryptography puzzles to mine new Bitcoin and thus earn money. Newer cryptocurrencies use the same mechanism to get people to use their resources for an endeavor that is a benefit to the public. For example, at the time of writing this job offer, the established cryptocurrency Filecoin makes people provide over 100000 GB of disk space.

Neonious is a well-funded start-up which belongs to a highly profitable company group. Mid 2021 Neonious is launching a cryptocurrency token which provides a strong incentive for people to use their free computing time to do molecular dynamics simulations. Molecular dynamic simulations are the key to understand how humans work on a cellular level. We will use this to make important breakthroughs in Alzheimer and dementia research possible.

We are currently looking for a

MD and Biotechnology Specialist (m/f/x)

MD und Biotechnologie Specialist (m/f/x)

working full-time in our headquarters in Düsseldorf, Germany.

Your tasks include:

- Help with refining the research plan
- Identify target proteins and ligands, identify variants of these through analysing genomic data or other cheminformatics methods
- Curate molecular dynamics tasks for the miners of our cryptocurrency token to run on their computers
- Experimental validation

What else we offer:

- 30 days of vacation, flexible working hours.
- Work in an international, open-minded team. You will work with different cultures and clients from around the world.
- Space for personal development.
- Experience in a cutting edge technology business.

What we expect:

- Prior knowledge in molecular dynamics and force fields
- Interest in technology, biotechnology and cryptocurrencies and the willingness to learn the basic concepts in all areas to be able to discuss the topics professionally
- Strong organizational skills and the ability to manage projects over a long time
- Good English oral and writing skills
- Good handling of computers, in particular also handling of MS Office, especially PowerPoint.

We want to get to know you!

Did we convince you? If that is the case, please send your application documents to:
